4

APP installation

IOS: Search "Video0" in App Store.
Android: You can also scan the below QR code to install.

IOS

Android

Video0

https://bit.ly/3FHFEXe

Note:
Android APP, need to download the APK file for installation, we will upload the APP to the Google Store as soon as possible,

Note:
In order to ensure the normal use of APP functions, please agree to the relevant authorization.

5

Note:

There are two ways to add a camera, auto mode and manual mode.

Auto Mode:
Need to turn on the mobile phone "Loucation Services".

When the phone WIFI selects the camera ID, the APP will automatically detect and add the camera.

Manual Mode:
Due to the mobile phone system and version, the APP cannot automatically detect and add a camera. At this time, You need to add cameras in manual mode.

In order to use the camera quickly, after the hotspot mode connection is successful, we will connect to the WIFI.
Thank you for your understanding.

6

Hotspot setting(Auto Mode)

Hotspot mode:
Without internet access, you can also use the hotspot working mode of the wireless camera for short-distance viewing.
Step1: Hold the ON/OFF button for 2 seconds until the red and blue lights flash together. Wait until the blue light bright and the camera hotspot powers on.

Step2: Enter "Wi-Fi" setting, connecting hotspot in "JS-XXXXXX".

**7**

Step3: Open "Video0"

Note:
In auto mode, Need to open the location services of the phone.

At this time, The APP will prompt whether to connect to the router.

Choose "Cancel" First enter the hotspot mode to watch the video, and then connect to WIFI.

8

Step4: Click "Cancel" ,Get real-time video in hotspot mode.
